

Welcome to the Omexom Network

On April 17th, Electrix officially became Omexom New Zealand

WHO IS OMEXOM ?

Omexom is the VINCI Energies brand dedicated to energy infrastructure.

Omexom helps electricity producers, transmission and distribution system operators, and local and regional authorities fulfill the promise of the energy transition. Our goals are to foster access to electricity, ensure secure supply, and develop sustainable energy.

Our business units notably offer innovative solutions for renewable energy, urban natural gas networks, electricity storage, low-carbon mobility, and energy infrastructure management. At Omexom, environment has always been at the heart of our concerns, which is even more essential for the coming years. Omexom is upgrading offers by using low-carbon processes and recycled materials that preserve the environment and, at the same time, is launching new low-carbon solutions.
